**LAVA**  **CABLE**

LET YOUR SIGNAL FLOW

### Lava Solder-Free Pedal Board Kit™

Lava Solder-Free Pedal Board Kit is a revolutionary do-it-yourself cable system designed by Lava Cable and G&H Industries featuring the smallest-in-class Lava Plug™ and Lava Mini ELC low capacitance patch cable. Unlike any other similar product on the market, the cable and plug were designed together as a matched pair using a special grounding sleeve instead of set screw for the ground connection to significantly increase reliability and provide for the best possible connection using solder-free plug technology. This system allows for closer pedal spacing than any like product on the market – it is truly Best-In-Class.

MAP: \$89.95 for kit with 10' Mini ELC Cable, 10 Right Angle Plugs and stripping tool

### Lava High-End Pedal Board Kit™

Lava Cable's innovative High-End Pedal Board Kit features the first true high-end cable to be used as part of a solder-free cable and plug system. The Mini Ultramafic consists of a 99.95% pure Silver Plated Copper (SPC) 20 AWG conductor and a 98% coverage SPC braided shield. This conductor and shield material provide for higher conductivity and lower resistance, which matched with a designed capacitance of 30 pF/ft significantly reduces signal loss on pedal boards and enables the best possible overall tone of any like product in existence. Its outer diameter of .195" makes the cable extremely flexible and a perfect match for any pedal board or rack system. This unique kit takes solder-free cable design to the next level. It works with our solder-free and soldered revolutionary Lava Mini Plugs. The cable and plugs are Made in the USA.

### Lava Solder-Free Plug Caps

Designed to allow for color coding for purposes like send/return, the Lava Solder-Free Plug caps fit snugly on all plugs, can be re-used and come in four colors: Black, White, Red and Green.

MAP: \$1.00 each

### Lava Solder-Free Cable Center™

Easy to assemble and set up, each Lava Cable Center™ comes with 100 Lava Plugs, 100 feet of Lava Mini ELC cable along with several stripping tools and a set of cutters. Multiple options are available. Ideal for making custom in-store cables and re-cabling pedal boards and it fits easily on store counters.

MAP: \$629.95 to \$854.95 based on plug type

### Mini Soar™ DIY Kit and Cable

The Mini Soar™ cable is a smaller version the Lava Soar™ instrument cable. The Mini Soar™ is a super flexible, affordable solid-core low capacitance patch and installation cable. It features 28 pF/ft capacitance, a 22 AWG solid-core conductor with spiral shield and a .155" outer diameter. It is ideal for wiring pedal boards and rack systems. The Mini Soar™ DIY kit comes with low profile G&H plugs with Copper Core Technology™.

MAP: \$49.95 for kit with 10' Mini Soar Cable, 10 G&H Nickel/Nickel Plugs

### Ultramafic™ High End Guitar Cable

“Ultramafic lava takes the composition and temperatures of eruptions to the extreme... creating a highly mobile liquid with viscosity as low as that of water...”

The Lava Ultramafic™ cable is our very best high-end cable and is designed to take your tone to the extreme and let your signal flow just like water. It features specially designed highly conductive layering and a 18 AWG silver plated stranded copper conductor as well silver plated 97% shielding for extremely low noise with capacitance at 25 pF/ft in the sweet spot range for instrument cables. This world-class instrument cable has a large outer diameter for durability and has been matched to Lava Cable's Silver Wire™ plugs – the only plugs on the market featuring a silver core. There is no other cable quite like it.

MAP: \$124.95 for a 20-foot cable

### American Stadium™ Guitar Cable

The Lava American Stadium™ cable is a special version of our flagship cable the Lava ELC with a red, white and blue outer cloth braid and white heatshrink with the CEO's signature, a 28-year veteran of the U.S. Army. It completely meets the U.S. Federal Trade Commission's Made in USA standard.

This cable is made in tribute to all those who have served in the Armed Forces of the United States, especially those who have paid the ultimate sacrifice. Like them, this cable is a true patriot. The cable is specifically designed for guitar and instrument applications and is designed to be flexible, rugged and provide superior high definition. 99.99% Pure Oxygen Free Copper (OFC) and superior components are used to make a world-class cable capable of superb performance in all situations. G&H nickel straight and right angle plugs are used and each cable is assembled using silver solder.

MAP: \$79.95 for a 20-foot cable

### Soar™ High End Guitar Cable

The Lava Soar™ is the most affordable solid-core high end guitar cable on the market. It features dual solid copper conductors in a unique configuration, superior shielding, highly conductive Lava Silver Wire Plugs standard, and a rugged outer braid for durability. It is flexible, and with low capacitance of 29 pF/ft in the sweet spot zone, it provides outstanding frequency response so you can hear your guitar the way it was meant to be heard. Lava customers around the world have been raving about how their tone is improved with this great cable. Your tone will reach new heights with the Lava Soar.

MAP: \$89.95 for a 20-foot cable

### Clear Connect™ II Cable (Solder-Free)

The revolutionary Lava Clear Connect™ II cable is now significantly better with completely re-designed solder-free Pure Plugs™ by Abbatron. Both the plugs and manufacturing processes have been improved to produce the most reliable cable of its type on the market. The cable features G&H Industries by Abbatron solder-free Pure Plug™ and Clear Connect Technology™ — a patented process where the connectors are high-pressure crimped onto the cable. As a result, the Lava Clear Connect™ II Cable produces the purest signal path possible. At 26 pF per foot its capacitance has been designed in at the sweet spot for instrument cables. With a large outer diameter of .260", 98% shielding, and 99.99% pure Oxygen Free Copper (OFC) for both the shield and conductor, it is a world-class cable capable of superb performance and durability in all situations that has been designed specifically with tight tolerances to fit the G&H Pure Plug™.

MAP: \$74.95 for a 20-foot cable

### Vintage Tweed Guitar Cable

Featuring a vintage tweed outer covering, The Lava Vintage cable is specifically designed for guitar and instrument applications and is designed to be flexible, rugged and provide superior high definition. 99.99% Pure Oxygen Free Copper (OFC) and superior components are used to make a world-class cable capable of superb performance in all situations. The capacitance of the Lava Vintage at 21 pF/ft is in the sweet spot range for instrument cables and was purposely chosen to provide the best sound possible. Every aspect of this cable was designed with the guitar player in mind to provide for low microphonics, reliability, and superior frequency response. G&H straight and right angle plugs are used and each cable is assembled using German made WBT Silver Solder.

MAP: \$69.95 for a 20-foot cable

### Un-Coil™ Guitar Cable

The Lava Un-Coil™ cable is our popular Retro-Coil cable before it is coiled and features an exclusive proprietary outer jacket that is a unique Hybrid Elastomeric Polymer blend that makes it the most light and durable coil cable available, and allows for vibrant colors not seen with the competition. It passes signal extremely well because the effects of high capacitance are minimized by using a 99.99% pure oxygen free copper low- strand count conductor and spiral shield, as well as a nitrogen-injected FPE dielectric to dial in the capacitance so this cable sounds just right – not too dark or bright. It is dead quiet in all situations due to a specially designed inner PVC jacket that was formulated to reduce triboelectric noise to a minimum. Gold plated G&H plugs by Abbatron with their patented Copper Core Technology™ are used with 4% silver solder to clearly set the Lava Un-Coil™ apart as best-in-class.

MAP: \$64.95 for a 20-foot cable

### Lava ELC™ Cable

The original cable that started it all! This cable is specifically designed to be flexible, rugged and provide superior, balanced sonic characteristics that enhance the sound of any guitar it is plugged into. It features a larger outer diameter of .305", 99.99% Pure Oxygen Free Copper (OFC) for both conductor and shield, and capacitance of 25 pF per foot that is in the sweet spot range for instrument cables. Every aspect of this cable was designed with the guitar player in mind to provide for low microphonics, reliability, and superior frequency response. It is terminated with G&H Ultra High Clarity™ straight and right angle Show Saver™ gold plated plugs using 4% silver solder.

MAP: \$69.95 for a 20-foot cable

### Blue Demon™ Guitar Cable

The Lava Blue Demon cable was designed for rugged stage use and provide superior performance at a bargain price, with better sonic characteristics and performance than all instrument cables in its class. It Features G&H Industries Ultra High Clarity Plug™ where the conductor is soldered directly to the tip, a 99.9% pure copper low strand count conductor, 23 pF/ft low capacitance, a 93% spiral shield for excellent RF rejection and it is assembled with 4% silver solder to maximize signal flow.

MAP: \$44.95 for a 20-foot cable

### **Pink Diamond™ Guitar Cable**

The Lava Pink Diamond cable was designed for the girls and to provide superior performance at a bargain price, with better sonic characteristics and performance than all instrument cables in its class. It features G&H Industries by ABBATRON Ultra High Clarity Plug™ where the conductor is soldered directly to the tip, a 99.9% pure copper low strand count conductor, 23 pF/ft low capacitance, a 93% spiral shield for excellent RF rejection and it is assembled with 4% silver solder to maximize signal flow.

MAP: \$39.95 for a 20-foot cable

### **van den Hul Hybrid Lava Guitar Cable**

The van den Hul Integration Hybrid Lava Cable represents the pinnacle in guitar cable design and uses four stranded “Fusion Technology” conductors in a star quad configuration. Its gold colored jacket is made of HULLIFLEX®. This cable is specially made for Lava Cable by van den Hul, a company with more than thirty years experience making specialized high-end audio cable. One customer commented: “All the frequencies are well represented. Good string definition. Fantastic harmonic bloom. Makes notes sustain forever. It has got some weird kind of mojo going on. There is something very special about the vdH.” The van den Hul Integration Hybrid Lava Cable is Made in the Netherlands and Terminated in the U.S.A.

MAP: \$224.95 for 15-foot cable

### **Magma™ Guitar Cable**

The Lava Magma cable was designed for rugged stage use and to provide superior, boutique performance at a budget price, with better sonic characteristics and performance than all instrument cables in its class. It Features G&H Industries Show Savers™ plugs, a 99.9% pure copper low strand count conductor, 29.5 pF/ft low capacitance, a 93% spiral shield for excellent RF rejection and it is assembled with 4% silver solder to maximize signal flow.

MAP: \$29.95 for a 20-foot cable

### **Krakatoa Coil™ Guitar Cable**

The revolutionary Lava Krakatoa Coil™ cable is a GIANT version of our first ever multi-color Morph Coil. It is the largest coil guitar cable on the market! It features an exclusive proprietary outer jacket that is a unique Hybrid Elastomeric Polymer blend that makes it the most rugged, light and durable coil cable available, in addition to allowing for bright vibrant colors and color combinations not seen with the competition. Tone choking effects of high capacitance are minimized by using a 99.99% pure oxygen free copper low-strand count conductor and spiral shield as well as a nitrogen-injected FPE dielectric to dial in the capacitance to a sweet spot so this cable sounds just right – not too dark and not too bright. To make this GIANT coil cable sound even better, G&H plugs by Abbatron with their patented Copper Core Technology™ are used with 4% silver solder to clearly set it apart as best-in- class. The only coiled guitar cable on the market entirely made in the USA – this includes bulk cable, plugs and final assembly.

MAP: \$99.95 for a 25-foot cable

### Mini Coil™ Guitar Cable

Designed to provide flexibility in spacing pedals while preserving tone, The Lava Mini Coil™ features a 99.99% pure oxygen-free low strand count copper conductor, G&H Show Saver Plugs and low noise due special layering and a proprietary outer jacket. The Lava Mini Coil™ can stretch to between one and 12 inches. It delivers superior sonic performance for a coiled patch cable and comes in a variety of colors.

MAP: 21.95

### Tephra™ Speaker Cable

The Tephra™ speaker cable has been created based on years of customer feedback from several different speaker cable types – combining the best features of these. It is a 8-conductor, 13 AWG, stranded copper speaker cable that significantly enhances guitar amp speaker performance and tone. With a thick outer jacket and jumbo G&H speaker plugs, it is built for the rigors of stage use and to be extremely durable. Like actual Tephra from a volcanic eruption, rigs using the Tephra speaker cable will explode with bigger, fatter, and better tone.

MAP: \$54.95 for a 3-foot cable

### Retro Coil™ Guitar Cable

The revolutionary, best-in-class Lava Retro Coil™ cable features an exclusive proprietary outer jacket that is a unique Hybrid Elastomeric Polymer blend that makes it the most light and durable coil cable available, and allows for vibrant colors not seen with the competition. It passes signal better than other coils because the effects of high capacitance are minimized by using a 99.99% pure oxygen free copper low-strand count conductor and spiral shield, as well as a nitrogen-injected FPE dielectric to dial in the capacitance so this cable sounds just right – not too dark or bright. It is dead quiet in all situations due to a specially designed inner PVC jacket that was formulated to reduce tribo-electric noise to a minimum.

MAP: \$64.95 for 20-foot cable

Colors: Black, White, Metallic Green, Surf Green, Sea Foam Green, Metallic Red, Metallic Purple, Metallic Blue, Carolina Blue, Hot Pink, Orange and Yellow

### Wireless Coil™ Guitar Cable

A first of its kind in the Music Industry, the Lava Wireless Coil™ is a small coil that stretches from 20” to 36” and comes standard with a 3.5mm Male TRS or Female TA4F plug to adapt to most guitar wireless units on the market. It comes in eight different colors and provides for excellent stress relief for wireless units.

MAP: 54.95

### Morph Coil™ Guitar Cable

The revolutionary Lava Morph Coil™ cable features first ever random blend of multiple colors – making each 25-foot coil cable and true “one-of-a-kind.” It also features an exclusive proprietary outer jacket that is a unique Hybrid Elastomeric Polymer blend that makes it the most rugged, light and durable coil cable available.

MAP: 74.95 for a 25-foot cable

### Super Coil™ Guitar Cable

The Lava Super Coil at 35-feet is longest coil on the market and is simply a longer version of our revolutionary best-in-class Lava Retro Coil™ cable, making it great for large stages and players who like to mover around a lot. It comes in nine colors.

MAP: 84.95

### Lava Power Tube™ Pedal Board Snake

The Lava Power Tube™ Pedal Board Snake is an innovative 6-Cable all-in-one snake designed to wire up any type of pedal board. This snake is fully customizable and includes cables for AC Power (shielded), Amp in (Lava ELC), Effects Send and Return (Lava Mini ELC), TS/TRS/XLR Footswitch, and CAT 5/MIDI 3, 5 or 7-Pin.

At 3/4" in outer diameter, the Lava Power Tube™ very flexible and can be terminated in multiple configurations. The effects send and return cables work with Lava Solder-Free and Soldered Mini Plugs. The cables are color coded and use-identified with clearly legible print legends. All cables are shielded so there is no crosstalk and noise. The AC power cord can even be terminated so a power Y cable can be used for multiple power supplies. There is no other snake quite like it. Finally there is a snake that can wire everything on any pedal board.! The Lava Tube™ can be purchased as bulk cable or terminated in Lava Cable's Custom Shop. Made in USA.

Price from \$169.95 (10-Feet) to \$279.95 (25-feet) dependent on length and plug options chosen. Bulk price is \$7.45 per foot.

### Fountain Microphone Cable

Lava Cable introduces the Fountain™ microphone cable – a no compromise star-quad cable designed to provide superior high end quality performance at a bargain price. The Fountain™ uses the purest available American-made oxygen-free copper in for use in audio cables for both the shield and its four 24 AWG conductors to achieve extremely low resistance and high conductivity – key to dynamic frequency response and efficient signal transfer. An outer diameter of .245" black high-grade PVC makes the Fountain™ very flexible and rugged. Featuring Abbatron's new gold-plated Beryllium and Trillium alloy copper contact XLR plugs that provide lower resistance, increased conductivity and greater stiffness for better contact and insertion/extraction durability than standard plated brass XLR plugs, along with a designed capacitance of 37 pF per foot, the Fountain™ possesses an industry unique configuration of insulation, conductors, plugs and materials which make it a superior microphone cable for both studio and stage use. Let your signal really flow with the Fountain™ microphone cable! The bulk cable is made and assembled in the USA.

### Bulk Lava Cable

Lava Cable provides the following cable in bulk:

- Mini ELC (100-foot spools and by-the-foot),
- Mini Soar (500-foot Reel Boxes and by-the-foot),
- Lava ELC (500-foot spools) and
- Vintage Tweed (500-foot spools).

### The Lava Plug Solder Version (LPSV™)

The Lava Plug Solder Version or LPSV™ is smallest soldered plug in existence. This innovative plug represents Lava Cable's ongoing efforts to provide world-class products that improve the playing experience for musicians. The LPSV™ has one solder point, and excellent ease of assembly. The included insulators make this plug virtually impossible to short once assembled. This revolutionary plug is completely identical to our Solder-Free plug on the outside. It is designed to work exclusively with our Mini ELC and Mini Ultramafic cable and comes in kits with either 10-feet or 5-feet of cable and a stripping tool or individually. Ideal for pedal boards and racks, LPSV™ brings unmatched small size, very low capacitance of 8.5 pF per plug, and the reliability of a soldered connection to musicians who require the best of all worlds.

### G&H Plugs by ABBATRON

Featuring industry unique Copper Core Technology™, these world-class plugs have higher conductivity and lower resistance than any other audio plugs, resulting in better sonic characteristics and performance for any cable they are attached to. Easy solder points and an “assembler friendly” design provide for the best ease of use and reliability of any audio plug on the market. They are made in the U.S.A.

Lava Cable is an authorized distributor for G&H plugs and we stock 20 different plug types. These are truly Best-in-Class plugs that will enhance the sonic characteristics of any audio cable.

### Lava Para-Strap VII™

The Para-Strap VII is has been created by a Paratrooper, Master rated Jumpmaster, and Skydiver and is designed and made to be affordable, rugged (combat ready), comfortable, easily secured to guitars, with unique features not found on any other guitar strap on the market.

The Para-Strap VII is adjustable from 44” to 54” and features thick, durable leather tabs, two-inch, Type 24 military parachute webbing; 22 inches of quarter-inch thick padding covered by two-inch tubular nylon; a dual-direction wireless unit holder and a Velcro retainer - serving as 2-point cable securing system. It is the only strap on the market with these unique features. It currently comes in eight colors: Blue, Orange, Yellow, Silver, Sage Green, Black, Tan and Coyote Brown. It is a super comfortable strap and is ideal for bass guitars and heavy guitars such as Les Paul's. It is completely Made in the U.S.A.

MAP: \$49.95

### Lava Tote Bag™

The Lava Tote Bag™ has been designed as an affordable, small gig bag to carry cables, pedals, small pedal pedal boards and accessories. It measures 20” x 12” x 5” and comes with eight Velcro loops to secure your cables.

MAP: \$36.95

Lava Cable, LLC is a veteran-owned Make-to-Order (MTO) USA manufacturer of audio cable and accessories for the global Music Industry.

We provide a wide range of unique, superior, innovative audio cable products and accessories for musicians with a Good-Better-Best product selection.

Each cable is proudly manufactured to order from bulk cable and plugs that are all Made in the U.S.A.

All cables come with the most responsive lifetime warranty in the industry.

Our products are designed to improve tone, functionality, and durability while providing unique solutions that enable musicians to enjoy playing and performing music more.

Lava Cable, LLC products have now been sold in more than 75 countries and we have active dealerships in 30 countries.

We are proud to have artists such as Steve Vai, Steve Stevens, Dweezil Zappa, Reeves Gabrels, Greg Koch, Greg V, Andy Wood, Todd Gummerman, Greg Howe, Neil Zaza, Guthrie Trapp, JD Simo, Carl Verheyen, Mark Slaughter, Jim Weider, Steve Kimock, Josh Smith and Brent Hinds as well as many other professional musicians using and endorsing our products around the world.

**Our mission is simple:**

To provide the best possible USA-made cable and accessory products while providing customer service second to none.

We invite you to become a part of the Lava Cable team and see why players and music stores around the world are switching to our products.
